

Decadence

Description:

Uniqueness was both a challenge and a goal when designing our Decadence leather. We wanted to create a leather with an exceptional hand very much like that of a pure aniline leather with the aesthetic of a semi-aniline leather. Produced on clean European hides and tanned in Italy, Decadence adds a luxurious element and since luxury is measured by one's own impressions of our surrounding and all that touches our lives this leather stands out as a luxurious investment. The color palette was inspired by nostalgia of the 1950's and interpreted for the up-and-coming colors needs of high-end design.
