

## St. Thomas

St. Thomas is a distressed leather with a rich sophisticated crackle surface that is desired by so many consumers today. Vintage and aged are looks that consumers desire but these leathers take years of use to cultivate. St Thomas give you a jump start on the distressing process using special waxes and oils bring life to the natural tanning process and allow the leather to crack and age with time while enhancing the look and feel. Expect St. Thomas to exhibit natural characteristics such as healed scars and brands as well as a color variation from lot to lot.
